INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/AU2005/000061

Box No. V	Reasoned statement und citations and explanation	er Article 35(2) with regard to novelty, inventive step or ins supporting such statement	ndustrial applicability;
1. Statement			
No	velty (N)	Claims $1-23$	YES
		Claims	NO
Inv	rentive step (IS)	Claims $1-23$	YES
		Claims	NO
Ind	lustrial applicability (IA)	Claims $1-23$	YES .
	. 11	Claims	NO

2. Citations and explanations (Rule 70.7)

The following document identified in the International Search Report is considered to be the closest relevant prior art:

D1: Standard Test Method for Maturity of Cotton Fibers (Sodium Hydroxide Swelling and Polarized Light Procedures). ASTM Designation D1442-80

Novelty (N), Inventive Step (IS)

D1 discloses a method and apparatus for classifying whether cotton fibres are mature or immature which includes exposing the sample of fibres to polarized light, capturing an image through crossed polar lenses and a compensator plate and manually comparing the measured interference colours with known reference data. However, D1 does not disclose the use of computer image analysis that is capable of determining the maturity of the fibres by comparing the image to reference data. Claims 1-23 therefore satisfy the requirements for novelty.

Furthermore, it is considered that in this art it would not be a trivial exercise to establish computer analysis that is capable of determining fibre maturity directly through comparison of interference data with reference data. Therefore the subject matter of these claims is not obvious and meets the requirements of Article 33(3) PCT with regard to inventive step.
